

# INTRODUCTION

## **1.1 ABOUT THE TOPIC:-**

As the project chosen named “Student Management System for COMMUNITY DEVELOPMENT THROUGH POLYTECHNIC Cell” which is introduced first time through the project by us.

It can be recognized as maintenance utility software for the computer in windows OS like 7.

## **1.2 ABOUT THE PROJECT:-**

The “Student Management System for COMMUNITY DEVELOPMENT THROUGH POLYTECHNIC Cell” has been developed **for our college** (Sheikhpura Abdur Rahaman Memorial Polytechnic) in an effort to make it has attractive and dynamic as possible.

### **The working of the project is as follows:**

As we use the platform of Visual Basic 6.0, it gives an attractive user interface & one form is linked with another. By this the general information about CDTP & its member wall is shown & in Registration form you can access the database. Otherwise, you are able to print application form & certificate for a particular student.

### **1.3 WHY THIS PROJECT:-**

If we define the project we project we have to have to say project means throwing something forward. We chose “Student Management System for COMMUNITY DEVELOPMENT THROUGH POLYTECHNIC Cell” as a project for this reason. So we can say throwing something forward like this type of program is the better or best one for us (members of project). Because it has a maximum scope to show or apply our skills in the field. So having this type of project is dream to us.

### **1.4 IN THE WAY OF PROJECT:-**

We face many complicated problems while developing the software, Learning codes & techniques to develop the project is becomes asset to us.

All over the full project is to us is a Freeform Learning Program. The journey of project gives us rewards of the life time.
